

## Training Goals

On the Starpath web page course descriptions we have a list of the many things we cover in this course. We also hope to speak with each participant personally about this before getting underway. But to help you and to help us begin thinking on this, please mark your top priority subjects in order 1, 2, and 3. We have plenty of time for individual instruction outside of the regular sessions and watch standing training to go over special topics, so this is the place to emphasize what you may want some extra work with. If there is another general category or specific subject you want to emphasize, please use the "other" option and briefly explain it.

- ☐ Chart work and course plotting
- ☐ Use of GPS and echarts
- ☐ Use of radar
- ☐ Watchstanding and driving
- ☐ Route planning around currents, ETAs, etc
- ☐ Anchoring
- ☐ Navigating narrow channels
- ☐ Engine room procedures
- ☐ Other, please explain

---

☐ Other, please explain
