

Fischer®

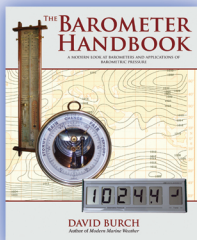

Precision Aneroid Barographs

The Best of the Best

Fischer Precision Aneroid Barographs provide a printed record of the atmospheric pressure over a 1-month, 1-week, or 1-day period. Four models are available, with electronic quartz clock or wind-up mechanical clock drives. Extra dampening for use at sea is an option on each instrument. The accuracy is ± 0.7 mb or better over the full working range of the instruments. Several ranges are available.

Navigator's Choice (Model 225 / 227)
